

The Power of Cannon Blue

Quality-based performance that really stands out — For more than 37 years Cannon Boiler Works' (CBW) distinctive blue products, like this Feedwater Heater, have “stood out” in commercial and industrial boiler rooms. That’s because our high-quality products not only look great, they are easy to install new or as a retrofit. By recycling waste heat energy in the exhaust, Cannon’s products result in lower operating fuel costs while also reducing greenhouse gas emissions. Payback can be achieved in less than a year, and our customers typically save tens of thousands of dollars each year in fuel costs. Is that extraordinary ROI? No, simply the amazing power of Cannon Blue!

Coming Soon... find out how you can achieve 95% efficiency with the newest development in heat recovery technology: the Ultramer!
