

# Cannon Heavy Duty Boiler Economizers

Let us save you thousands of dollars per year from your boiler fuel bill by capturing the heat in your exhaust gasses. Reducing your operating cost is no longer a luxury, but necessary for survival in today's economy. Cannon manufactures economizers with a target of long life in harsh corrosive environments. Our units are designed for low gas side pressure drop in order to retain peak boiler performance.

# ***Cannon Heavy Duty Boiler Economizers***

## Features include:

- Heavy-duty construction with corrosion allowance on structural components.
- Infinite variations in sizes and shape to fit any steam systems
- Solid tube sheets to keep gasses in the finned tube area for better heat transfer.
- Solid tube sheets also keep return bend corrosion to a minimum.
- Solid steel gas seals allow easy tube replacement.
- Removable side and rear doors for inspection and maintenance, are insulated to improved efficiency.
- Vertical or horizontal flue gas flow designs
- ASME Code and National Board Certified
- Also available for gas turbine or hydrogen fuel cell heat recovery systems
