

Cannon Feedwater Heaters

Model FB

Model FS

Model FJ

Model FG

Let us save you thousands of dollars per year from your boiler fuel bill. Reducing cost is no longer a luxury, but necessary for survival in today's economy. Cannon manufactures the most innovative, efficient, and service friendly heat recovery units available. Our units are designed for low gas side pressure drop in order to retain peak boiler performance. Most paybacks on installed systems are ***less than one year.***

Features include:

- Lightweight modular design with standard transitions to ease installation
- Sizes to fit 40BHP to 150,000lb/hr steam systems
- Baffles & drains to remove water and protect boiler
- Easily replaceable finned tubes, no welding required
- Condensing units with all Stainless Steel construction
- Easily removable side and rear doors for inspection and maintenance
- Vertical or horizontal flue gas flow designs
- All replacement parts are available individually
- ASME Code and National Board Certified
- Also available for gas turbine or hydrogen fuel cell heat recovery systems
